

## Batting Statistic Organizer Running Instructions

1. Download the data file: Batting\_txt.txt and Python program: batting\_file.py to the same folder on your computer.
2. Run the Python program.
3. A menu will be displayed. Select your desired statistic. Use the number choice or abbreviation located alongside your choice in parentheses.
4. Hit enter.
5. Give the program a few minutes to run. The data file is large.
6. Type in your desired playerID in all lowercase letters. Hit enter.
7. Type in your desired year. Years being at 1871 and go until most recently 2016. Hit enter.
8. The menu selection and coinciding statistic will be displayed. Along with the menu again.
9. You may choose another statistic, or exit the program by typing 0 or EXIT.
